(54) METHOD FOR UPDATING REMOTE HOME APPLIANCES AND SYSTEM THEREFOR

(57) Abstract:

PURPOSE: A method for updating remote home appliances and a system therefor are provided to forcibly switch a state of the home appliances into a download-capable mode when up-version function data are not downloaded, and to update a system function by downloading the up-version function data from a server, thereby updating a function of the home appliances even when the home appliances are not normally operated. CONSTITUTION: The first unit(321) forcibly switches a state of home appliances(320) into a download-capable mode when up-version function data are not manually or automatically downloaded. The second unit downloads the up-version function data from a server(300) by the first unit(321), and updates a system function. The second unit comprises as follows. The first memory stores function data to be executed or programs. The second memory stores a downloaded and function installation program(323). The second processor(324) executes the programs stored in the first memory and the second memory.
